EFFICIENT REMOVAL OF GREEN DEPOSITS

As spring approaches, maintenance and cleaning of outdoor surfaces become a priority for many businesses. Green deposits on façades, fences, paved areas and industrial outdoor surfaces are not only a visual issue, but can also affect material durability why safety over time.

Biosativa® Bio Cleaner Concentrate offers a powerful and environmentally responsible solution designed for professional and commercial use.

CCM® TOP SELLER CATALOGUE

New CCM® "TOP SELLER" Product Catalogue Now Available for Download

Across 84 pages, the catalogue showcases CCM® best-selling solutions, including Liquid Glass Coatings, long-term disinfection products, as well as bio-based and specialty cleaners.

687 CARPET COATING

687 Carpet Protect is an aqueous, room-temperature curing impregnation for textiles (PES, cotton, PA and blends) that provides hydrophobic (water-repellent) and oleophobic (oil-repellent) properties. The penetration of water, dirt, coffee, cola, ketchup, red wine, and more is significantly reduced, making coated surfaces easier to clean and maintain.

PROTECT YOUR HOME WITH CCM® LIQUID GLASS STONE COATINGS

Whether on façades, driveways or terraces, stone and concrete/mineral surfaces are exposed to weathering and contamination every day. Our Liquid Glass stone coatings create an ultra-thin, invisible protective layer. It prevents water penetration and significantly reduces algae growth, oil stains, barbecue residue and many other types of contamination. We also offer slightly visible coatings that enhance the natural colour of stone while providing protection against graffiti, oil, and aggressive chemicals.

Would you like to learn more about how our stone coatings work and what benefits they offer?

PFAS-FREE LIQUID GLASS COATINGS

From October 2026, the EU will prohibit certain PFAS substances (such as PFHxA) in various consumer products. Industrial applications (e.g. membranes, special filters, and vehicle interiors) may also fall under a broader PFAS regulation expected as part of the upcoming REACH revision, which is still under discussion.
