WIRELESS IP 5.8 G HIGH DEFINITION HD

PLUG&PLAY pre-configured installation, with professional features
(i.e definition of areas of privacy), image compensation, motion detection

- **NVR Network video recorder**
- **No need for wiring**
- **Dual Antenna WiFi 5.8G** allows high definition HD transmission with interferences
- **IP Wireless** no need for other equipment
- **6 mm Lens**
- **Image compensation**
- **Privacy areas**

The Megapixel definition finally available in a Plug&Play solution The video surveillance system IP CCTV Exponent it's the smart solution for prevailing security needs: a new efficient solution of a IP CCTV Wireless Kit expandable up to 9 cameras.

Subtle and compact, offers the possibility to view your cameras both locally and remotely. Perfect for small business – home, office, stores – and whatever wiring can be a nuisance or even a problem. This ready-to-install Exponent Kit includes all the top range components necessary for a complete, easy and pre-configured installation.

Maximum security with a minimal installation

HD Monitoring

Full Motion &
HD registration

display, analyse
and alert

Remote access
and management

Wireless, implements the quality features than only IP technology is able to offer

HD MONITORING

IP Megapixel technology allows Full Motion HD registration. Resolution up to a 1280 x 720 P with 6m m lens. Each camera IPCAM it's already paired with the NVR router: no additional configuration is necessary. System is expandable and allows to install up to 9 cameras IPCAM automatically switch to IR day/night mode up to 15 meters.

Registration can be viewed remotely in real time on tablet, Smartphone or PC. In this case, mobile APP allows up to 16-split-screen display. Weather resistant, sturdy IPCAMs, include adjustable supports for easy installation.

FULL MOTION &
HD REGISTRATION

Registration can be full time (24 hours) or can be activated on demand when needed (upon exiting the house or office, during closing hours, etc.) It is possible to exclude from monitoring sensitive areas subject to compliance with the Code on the protection of personal data NVR router included in the kit is accessible from 100 meters. Dual antenna WiFi 5.8 Giga: WiFi 5 Giga technology allows transmission without interferences. Includes 1 Tb hard disk, can support optional hard disks up to 4 Tb. 9 IP channels for 9 IPCAM. Analyses data and send alerts to Smartphone. Supports P2P Cloud forwarding, remote management from Tablet, Smartphone, Iphone, Android and Blackberry. Compact size and noiseless.

DISPLAY, ANALYSE
& ALERT

Video output HDMI/VGA; supports 256-split-screen video, 16-split-screen on remote. To access IPCAM registration is possible to install a software dedicated to monitoring the IP CCTV system on one or more stations. Displaying Full D1 (1280x720 Pixel per channel) – Full Motion

REMOTE ACCESS
AND MANAGEMENT

Complete remote management. Remote management from Tablet and Smartphone. Differently from the market standard GF2015IP allows by means of the Tablet and Smartphone software to completely manage the system, not only the IPCAMs; allows remote reproduction of registrations. This option represent an essential benefit. Receives notices and alerts.

Cleaning products.

Cloths described as “microfiber” can vary widely in the size of the fibers they use and therefore in their cleaning effectiveness. In the best cloths, perfect examples of micro technology, the fibers are 10–50 times thinner than a human hair— three to five microns in diameter. That is why high quality microfibers cloths are able to attach themselves to even the smallest, most microscopic dirt particles—including bacteria or pollen grains.

Perfect for the regular cleaning necessary to keep that clear definition on high quality glossy displays.

The best of professional micro technology for safe effective cleaning of your precious screens and multi-touch displays.

- High quality technology micro cloths for professional use
- Removes dirt, grease and fingerprints improving hygiene
- Highly effective on smallest particles, including pollen grains
- Absolutely non-abrasive
- Save on detergents and thus improve the environment

88127M^{CODE}

Dust-Off MicroCloth

The Advanced Microfiber Technology of this suede-like microfiber cleaning cloth allows to clean a variety of surfaces – safely and gently. MicroCloth removes dirt, grease and finger smudges from all kind of screens, lenses, glasses, lab equipment. Soft, non-abrasive, this cloth keeps

screens crystal clear. No harsh, damaging chemicals, sprays or polishes needed; however, the cloth can be used also with them. Hand or machine washable at 60°. Convenient size, 170 x 170 mm, easy to transport for everyday use.

77020^{CODE}

High End XLarge Microfiber Cloth

An especially high quality microfiber cloth for the professional use. Cleans any kind of surface of screens, technical equipment and sensitive devices, removing dirt and fingerprints and keeping your screens

crystal clear. Extra large size 38 x 38 cm, ideal also for bigger surfaces. No harsh, damaging chemicals, sprays or polishes needed; however, can be used also with them. Hand or machine washable at 60°.

Agfaphoto Portable Cleaning Kit

Ideal for I-pad, I-phone, smartphone, mobile phone, LCD/TFT screens, notebook, lenses, camera's etc. Contains 1 x 7ml

spray + Microfiber cloth 20 x 20 cm. AgfaPhotoQuality.

CODE 77017

Spray Plaster

Delicate solution for small cuts and abrasions, offers immediate protection against bacteria. Waterproof, transparent, transpiring and flexible, the film acts like a

second skin. Protects from water, dirt and bacteria and helps the natural healing process. The application lasts for more than 2 days - 30 ml.

CODE 16/800.20.50
Clean Office filters

Not only on the street but also in our offices we face fine dust emitted by laser printers that pollute the air. The fine dust enters our lungs - with cancer-causing effect - and causing great discomfort for sensible and allergic persons. Clean Office prevent the built up in the air of toner fine dust from laser printers and photocopiers. Easy and simple application on air ventilation slots makes the environment healthier.

Efficient protection against the finest toner dust into the air. Patented filter media with electrostatically charged comb pattern. The printer ventilation is not impaired, which is also certified by the German TÜV suitable for most printers and photocopiers. ECARF certificate from the European Centre for Allergy Research Foundation that stands for allergy-friendly products and services. Lasts 6 to 12 months depending on the use of the printer. Universal product size 150 x 120 mm Quality Made in Germany.

To identify the correct air outlet slots where to install the filters, please check the updated list of compatible printers on the following internet site: www.exponentworld.com

CODE 16/800.40.50
Clean Office Carbon filters

Ozone and fine dust filter for laser printers and photocopiers. It prevents air pollution by ozone, benzol, toluol and other organic (VOC) fine dust and nanoparticles. This filter also prevents the diffusion of unpleasant odours. The filter consists of a patented filter media with an electrostatically charged honeycomb

structure as well as an additional activated carbon layer. The independent test laboratory "fiattec - Filter & Aerosol Technologie GmbH" tested the Clean Office CARBON filter with following result: the ozone reduction efficiency is about 95 %. Universal product size 150 x 120 mm

CLEAN OFFICE CARBON FILTER BESIDE FILTERING FINE DUST PREVENTS DIFFUSION OF:

- unpleasant smell
- ozone
- benzol
- toluol
- other organic particles

CLEANING WITH THE POWER OF NATURE.

We all want things in our lives to be clean but so many of today's cleaning products are both toxic to humans, plants and wildlife and in many cases actually damage the very thing they are supposed to be cleaning. BIOSATIVA is a stunningly effective cleaning product that is absolutely non-polluting, water-soluble fluid which can be used safely in the home, office, factory almost anywhere that dirt and grime removal is required. It is not harmful to surfaces, it is dermatologically harmless, 100% biodegradable and bio-compatible (no negative impact on plant, animal or marine life). BIOSATIVA is a completely organic cleaner, which uses a new form of tenside created in the most part from hemp oil and yeast; these highly active amphiphilic tensides allows BIOSATIVA to offer exceptional cleaning power that normally only highly polluting cleaning agents can offer. BIOSATIVA is completely safe, requires no special precautions - you can even drink it - and can be washed away into normal drainage systems and because of it's de-greasing abilities it actually cleans the pipes and filters which helps clear blockages formed by oil, fat and grease solidifying in the pipes. Made of natural resources. 100% bio-degradable. Neither water polluting nor harmful for animals and plants. Even ideal for cleaning of oil-contaminated animals, fish ponds, and for degrading oil more rapidly on "clarifying basins".. Enormous cleaning power.

Non-corrosive to any materials. With BIOSATIVA you only need one product to do it all, including carpet, fabrics, paints, wood, outdoor cleaning of any type, plastics, metals ect. Super concentrate: 1:10 ratio is required for any stubborn stains or oils, and just 1:20 or less ratio is required for general cleaning on all surfaces. Made in Germany.

Because of its unique characteristics, BIOSATIVA is gold winner of the environmental "Green Apple Award" (Europe 2012). Patented. Made in Germany.

Long-term Surface Disinfection.

The number of infections by microorganisms has grown tremendously: Bacoban is the answer. Bacoban® is a highly developed and "intelligent" disinfection-system " with controlled release. Conventional disinfectants are effective immediately – but only for a short period: microorganisms are only killed during the few minutes of the duration of the active period. Bacoban® has a long-lasting anti-microbial effect: up to 10 days.

The real benefit Bacoban® is that it ensures a significantly higher safety against the spreading of germs and viruses, this reducing re-infection. Bacoban® has been specifically developed to improve safety between the individual disinfecting steps and to give people a new tool in the control of germs and viruses.

Alongside the proven direct germicidal and virucidal effect, Bacoban® also has two further highly effective mechanisms. Antimicrobial effect for up to 10 days (bactericidal, fungicidal) After evaporation of the disinfectant, Bacoban® forms an ultra-thin layer (sponge) that stores biocides, which are slowly released whilst the surface is in place and kill the bacteria and fungi – for up to 10 days. Bacoban® has a strong effect against viruses and pathogens, such as Hepatitis B and C, vaccinia, HIV, Staphylococcus aureus, BVDV (Filoviridae, Ebola), influenza virus including H5N1 (Avian flu virus), rotaviruses, Pseudomonas aeruginosa, Candida albicans Adenovirus and some more.

Easy-to-clean surfaces: Bacoban forms an ultra-thin layer that establishes an easy-to-clean surface and reduces the cleaning requirements by more than 50%. Furthermore, the ultra-thin layers built up on the surface, so that contaminants can be more difficult to adhere.

Bacoban is ideal for cleaning and disinfection and has a mass of applications and demand for its use: public places, retail markets, offices, restaurants, aerospace, health care,

schools, public transportations, veterinary (veterinary practices, live-stock farms and pet owners), tourism business (Cruise liners, Hotels etc.), leisure (Spa resorts, Swimming pools, Theme parks), gym and sporting goods...virtually anywhere a safer environment is required or simply desirable.

Bacoban is patented and has certified bio compatibility according to DIN EN ISO 10993-1, and is certified class 2A CE medical device. Bacoban disinfectant products does not contain Silver, Triclosan, Aldehyde or Phenol.

Features:

- Cleans and Disinfects in one operation.
- Kills bacteria in 5 mins (EN 1040, EN 1276)
- Kills Fungus in 5 mins (EN 1275)
- Kills Viruses in 5 mins (Test reports available)
- Provides up to 10 day protection against bacteria and virus
- Easy to apply
- Cleaning and Disinfecting in accordance with Directive 93/42/EEC.
- Complies with ASTM E 2180 standard

BACWB1D CODE

BACOBAN Water Based Concentrate

The highly developed and ready to use disinfectant with controlled release: antimicrobial effect last or up to 10 days. Kills germs, bacteria, viruses and fungi in few minutes, while the ultra-thin layer additionally establishes an easy-to-clean

surface. Must be diluted 1:100 (1 liter=100 liters) and so it's specially convenient for large areas, professional or health care applications. Bio-compatible. Patent pending. Made in Germany Bottle 1 lt.

BACD500DI CODE

BACOBAN Water Based Ready-to-use with spray

The highly developed and ready to use disinfectant with controlled release: antimicrobial effect last or up to 10 days. Kills germs, bacteria, viruses and fungi in few minutes, while the ultra-thin layer additionally establishes an easy-to-clean surface. Handy and practical

wipes are perfect for smart devices and small appliances, as well as for laboratory, professional or personal tools. Bio-compatible. Patent pending. Made in Germany Bottle 500 ml with spray

BACDLTUE CODE

BACOBAN Water Based Ready-to-use Wipes

The highly developed and ready to use disinfectant with controlled release: antimicrobial effect last or up to 10 days. Kills germs, bacteria, viruses and fungi in few minutes, while the ultra-thin layer additionally establishes an easy-to-clean surface. Handy and practical

wipes are perfect for smart devices and small appliances, as well as for laboratory, professional or personal tools. Bio-compatible. Patent pending. Made in Germany Pack of 50 wipes, 180 x 200mm

This truly remarkable, multi award winning technology allows the end user to protect both industrial and domestic surfaces with a super durable coating of invisible, easy to clean, glass. This nanotechnology allows the end user to deposit a nano scale layer of molecular, particle free glass, onto the surface of most items. The molecules of glass (silicon dioxide/ SiO₂) come from pure quartz sand, of which there are vast reserves, as silicon dioxide is one of the most abundant compounds on the planet. Just like domestic glass, the coatings are chemically inert and highly resistant to acids. The coatings also offer resistance to alkalis and solvents; however, despite some similarities to standard glass the Liquid Glass coatings are stunningly different. The layer is flexible, breathable, highly durable, heat tolerant, anti-microbial and offers nonstick and “easy clean” characteristics. The application of the Liquid Glass range of products is amazingly straight forward. After preparatory cleaning, items can be coated in a matter of seconds. Significantly most coated surfaces can be cleaned with water alone; this of course massively reduces the use of environmentally damaging cleaning products.

- Long lasting effect (up to decades)
- Protects from water, dirt, bacteria, rust, grease, frost, friction, UV (to prevent fading), alkali, sea water, salty air, and heavy staining ...
- Odorless, anti-microbial, heat tolerant, breathable
- Easy to apply in seconds (wipe or spray)
- Non-toxic
- Environmentally friendly: drastically reduces the need of chemical detergents
- Contains solvent, no waxes or silicones, for a non-stick, glossy finish
- Particle free with no negative effects, can be used on the most delicate surfaces
- Endless application: suitable in industry, auto, marine, aviation, food industries, med, facilities, building, textiles industry and more, as well as for domestic use
- Made in Germany

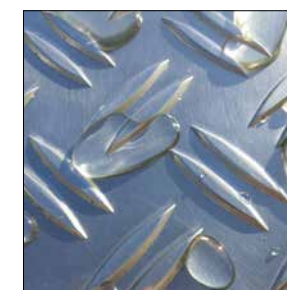

600-1

CODE

Glass and Ceramics

Clear, colorless liquid, produced water, oil and soil repellency. Resistant to frost, extreme heat, UV radiation, salt water and salty air, minerals from hard water and alkalis, algae and bird droppings. Surfaces remain clean much longer, which makes cleaning cycles extended and significantly reduced costs, time and energy for cleaning and maintenance. Reduces the growth of microorganisms and bacteria,

thus improving the hygiene. Grime, finger marks and water stains can be easily removed without using aggressive chemical cleaning agents. Ideal for use on bathrooms, shower screens, windscreens, windows, skylights, conservatories, balcony doors, shop windows, glass facades, mirrors and much more. Coating last 2-10 years, coverage rate 100 m²/lt.

650-1

CODE

Plastic and Metals

Easy to apply and easy to clean effect; treated surfaces remain clean for prolonged periods. Soiling, grease, fingerprints and residue can be easily removed with water. Ideal for use in bathrooms, professional

kitchen, furniture, healthcare environments and public buildings. Food safe colorless liquid, used within NHS hospitals (National Health Service of the UK). Coated surfaces can be used minutes after application.

622-1

Wood

This coating is designed to penetrate into the structure of the wood. It is suitable for all kinds of wood, which has not previously been coated with varnish or other stain resistant additives in furnishing, flooring, building... It will not alter the natural look of wooden surfaces, yet it provides a hi-

ghly durable timber coating, which protects the wood from water ingress, salts, mould, stain and grease. The coating will also reduce the rate of discoloration due to oxidation. Lasts 3-10 years. Coverage rate: 10-50m²/lt, depending on the absorbency of the wood.

689

CODE

Textile

Creates water, oil and stain resistant fabric forming a long-lasting, transparent, ultra-thin layer. Optimal use mainly on PES and synthetic fibres. Coverage rate: up

to 25m²/lt, depends on the quality of the textile. Lasts up to 40-50 hand washing cycles

CODE

620-1

marble, granite, stone, cement and shingle

This colorless sealant, applicable in indoor and outdoor areas, is designed to penetrate deep into the structure of the stone. After coating, the stone receives optimum protection against dirt, abrasion and especially water infiltration. Sealed surfaces stay breathable and resistant to frost, UV light, salt, dirt, pollution, weathering and extremely resistant to abrasion, water and dirt repellent. The coating reduces the amount of moisture on the surface considerably, thus minimizing the growth of mold, moss and algae and discoloration caused by pollution; unsightly dark water stains are

avoided. The seal is particularly effective on mineral surfaces such as sandstone and limestone, travertine, concrete, plaster and masonry and can be applied to soils. On many stones (especially in very solid stones such as marble and granite) offers exceptional soil-repellent properties. The seal remains highly effective for at least 10-20 years. Graffiti protection: Although Stone Sealant has not been designed specifically for the anti-graffiti applications, it still offers these features. It prevents the deep penetration of most graffiti inks and allows easier removal.

CODE

600-12

Car Glass

Generates an invisible (transparent) surface that acts as a water-/dirt-repellent, polishing and protecting in one easy single application. Contains solvent, no waxes or silicones non-stick, glossy finish. Resistant to frost, friction, salty air, bird fouling

and heavy staining; prevents tar, sap and insect residues from sticking to the surface. Long lasting, remains active for up to 2 years. Treated surfaces remain clean and "easy to clean" mostly with just water, thus reducing the costs of cleaning and care.

CODE

610

Solar and photovoltaic panels

This liquid glass sealing adsorbs light and increases the efficiency of the plant considerably, depending on the season and weather, by an average of up to 25% and more. Dirt - including algae and bird droppings - cannot adhere and is washed away by rain. The cleaning cycle of the plants is significantly reduced; no chemical cleaners are needed (thereby protecting the environ-

ment). The sealing pays for itself after only a few months. Physiologically harmless. Suitable for temperatures from -25 ° C to + 80 ° C, resistant to frost, extreme heat and UV radiation. Effectiveness of the coating 3-10 years under most environmental conditions. The seal can be replaced without any problems. If the effect decreases

CODE

650-12

Car Bodywork

Very easy to use emulsion contains particles that are much smaller than in conventional polishes and thus penetrate deeper into the structure of the surface and have a more intense and longer effect. Contains solvents, no waxes or silicones for a non-stick glossy coating. Transparent / invisible, cleans, polishes and protects in one operation. Resistant to

frost, cleaning, UV (prevents fatigue of the paint), alkali, salt water, salt air, insect and other heavy soiling that remains on the surface. Water- and dirt-repellent. Reduced air resistance considerably and reduced scratches. "Easy-to-Clean" effect, coated surfaces stay cleaner longer and are easier to clean mostly with just water. Long-lasting seal that stays up to 3 years.

650-13

CODE

Boat

Very easy to use emulsion, optimal for use to prevent high dirt and abrasion. Contains particles that are much smaller than in conventional polishes and thus penetrate deeper into the structure of the surface and have a more intense and longer effect. Non-stick, glossy coating, transparent / invisible. Cleans, polishes and protects in one operation.

Resistant to frost, cleaning, UV (prevents fatigue of the paint), alkali, salt water, salt air, insect and other heavy soiling. Water- and dirt-repellent. Protects from UV negative effects. Reduced air resistance considerably and reduced scratches. "Easy-to-Clean" effect, coated surfaces stay cleaner longer and are easier to clean mostly with just water. Long-lasting seal that stays up to 3 years.

650-14

CODE

Caravan and camper

Very easy to use emulsion contains particles that are much smaller than in conventional polishes and thus penetrate deeper into the structure of the surface and have a more intense and longer effect. CODE

LiquiGlas - Car/ Motorcycle protection Kit

Advanced technology protection uses a very thin layer of pure glass (500 times thinner than the human hair) that can be applied over all plastic and glass surfaces on cars and motorcycles. Reduces the presence of insects, dirt, rain and ice on helmets, car windshields, rearview mirrors, lights. One application lasts up to 6 months and the car or motorcycle will be easy to clean - for the little that would

remain to clean - with just water. Nanotechnology Made in Germany. One kit contains:
2 pre-cleaning wipes
1 plastic treatment wipe (2-2.5 m2)
1 glass treatment wipe (2-2.5 m2)

Crystalusion

100% BUBBLE FREE

GADGET

PROTECTION

CODE CRYSF

Crystalusion - Liquid Glass Protection

The revolutionary Liquid Glass Protection that can be applied not just on screens but also on the entire device. Smart protection for smart devices that do not make bub-

bles, invisible to the naked eye and 100% light permeable, antibacterial and 600 times harder than conventional protections.

Antimicrobial

Crystalusion - Liquid Glass Protection is Antimicrobial, this means bacteria cannot live on the protective layer - helping to keep your device germ free. ASTM E2180 antimicrobial tests proved a 99.9% reduction in levels of organisms when tested with Salmonella, Staph. aureus and E. coli

100% Invisible

Crystalusion - Liquid Glass Protection will not affect the viewing clarity or aesthetic look of any device. Because the Crystalusion layer is formed at the nanoscale it is completely invisible to the naked eye and because it is 100% light permeable it will not affect screen resolution or colour clarity.

Bubble free

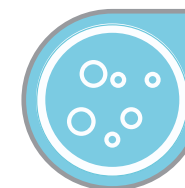

Crystalusion - Liquid Glass Protection is particularly unique because it is applied as a liquid, because of this air cannot become trapped between the Crystalusion layer and the device giving a completely bubble free application over the entire device - not just the screen.

600% Harder

Crystalusion - Liquid Glass Protection is laboratory tested to ASTM C1624-05 Qualitative Single Point Scratch Testing using a 0.2mm tip radius Rockwell diamond and is laboratory certified to withstand up to 56N before showing visible signs of scratching - that's 600% more resistant than a traditional screen protector!

Diamond Tested

Anti Bacteria

100% Invisible

Easy Clean

Bubble Free

Competence in Dry Ice Cleaning

How it works

Dry ice is made from liquid carbonic acid (CO₂). The contact of CO₂ with the object to be cleaned reverse the ice into gaseous form expanding it more than 500 times; this produces a miniature explosions and cold shock (-78.5° C) that effectively detaches dirt particles from the surface without damaging it.

Revolutionary Dry Ice Blasting Cleaning Technology

Clean and residue-free

Impact with the surface to be cleaned sublimates the pellets and reverts them directly into gaseous form – for zero moisture or blasting medium residue. The only thing that results is the dry dirt.

Safe

Dry ice blasting is non-voltage conducting and is therefore safe for directly cleaning even live components (e.g. switching cabinets, engine components, etc.)

Eco-friendly

Dry ice is cleaning without chemical additives. Dry ice is also non-toxic, non-flammable, tasteless, odorless and bacteriologically neutral.

Economical

Environmentally friendly

Efficient

- Highly delicate, precision-adjustable and hence extremely gentle blasting operations, even on delicate surfaces as textiles
- A very attractive appearance housed in a compact design
- Low air consumption and a wide range of applications even when used with conventional air compressors
- Extremely low-noise
- Revolutionary technique for very high efficiency and very low ice consumption
- User-friendly and intuitive handling

Dry ice blasting offers virtually unlimited fields of application.
