

# PRODUCT WORLDS

# NOTHING'S IMPOSSIBLE!

24 HOURS FOR YOUR CUSTOMISED  
PRESENTATION, LABEL, CUSTOMISED  
PACKAGING OR DISPLAYS?

**WE CAN DO IT!**

## FOREWORD

Thank you for taking time off to view our company and product presentation. We would like to convince you of our products and present you with a brief overview of our company on the following pages.

As an existing customer you are surely already well versed with our products and services, however you will certainly discover a lot of „new innovations“, since we continuously pursue further development.

As a prospective customer, we wish to make you curious about us. We wish to be given the opportunity to win you over as a customer.

The STARK® GmbH is characterised by the fact that we attach enormous importance on being able to offer a unique vertical range of production. From the development through to the finished product in the packaging. We are with our extensive machinery, able to present you with your customised presentation (Labels and customised packaging through to the display) in printed

form within a day. Our products are in the meantime produced by nearly 50 employees on a more than 5,000 square meters area, in Straubing. We do not only produce large quantities, but also look forward to your customised presentation - of course also in small quantities and for limited circulation.

The STARK® GmbH is a medium sized company that operates completely independent of banks and corporations. The entire production facilities, inventories and receivables are financed from its own resources. This allows for free and fast decision-making processes.

Please take the time to look through this brochure. You will certainly discover options that you have up to now not conceived. We are happy to take the time to advise you personally.

Ask us, and we will surprise you.

*Sincerely, Rudi Hirtreiter*

**Rudi Hirtreiter**  
*Managing director*

## STARK & CCM – SALES CO-OPERATION ESTABLISHED TO PROMOTE WORLDWIDE SALES

STARK GmbH & CCM GmbH from Overath near Cologne are organising the worldwide sales of the STARK products together.

The collaboration is the result of the personal friendship of the owners. CCM GmbH as a manufacturer and designer of specialty chemical products (eg liquid glass coatings and long-term surface disinfection) has integrated the STARK products into its global sales platform.

CCM has an ever expanding international sales platform and now has agents in more than 50 countries; mainly in Asia, Latin America, the US, Russia and Europe.

Bernd Zimmermann, who has a vast range of experience in this business sector, especially in the field of private label is your contact person.

YOUR NOTES	42

STARK® is the German quality brand for effective surface care. The STARK® GmbH benefits from the chemicals know-how and from the product and market experience of the Straubing team.

We provide thought-through solutions for almost every area of application.

The excellent customer benefits of our products have among others been confirmed by the TÜV Süd and the Dekra, with best reviews.

This provides for certainty, trust and ultimately also satisfaction on the part of the customer.

# GLASS COATING KIT

The STARK® Glass Coating Kit provides the glass with an invisible, water-repellent layer that repels rain and sleet. The droplets that are thereby formed are easily blown away by the wind. The STARK® Glass Coating Kit is suitable for all viewing windows in the vehicle. An application to the inner surfaces of the panes can significantly improve visibility during night driving.

### Content:

- 1x 500ml glass cleaner in pump spray bottle
- 1x 100ml glass coating in pump spray bottle
- 2x micro-fibre pre-cleaning wipes
- 2x coating wipes
- 1x dry wipe
- 1x protection glove (to avoid fingerprints)

# SCRATCH REMOVER FOR CAR PAINTINGS

The STARK® Scratch Remover removes all scratches, scuff marks and scrapes that do not extend to the primer coat of the vehicle. It is suitable for:

- deeper scratches and scrapes that are usually caused by carelessness, actions of third parties or wilful damage
- medium scratches that are for example formed by the action of other vehicle doors, placing objects and keys on the vehicle or when removing snow and ice in winter
- minor scratches caused by vehicle washes or shrubs
- traces of paint that usually result from jostling when the doors are opened or when parking
- deepest scratches that extend to the primer, with the prior use of a paint pen.

### Content:

- 1x 25g tube Repair-Polish No. 1
- 1x 25g tube Finish No. 2
- 4x special grinding paper
- 2x professional polishing wipes
- 1x grinding and polishing dice

### Kratzer-Entferner

- ▶ Sehr gute Wirksamkeit bei leichten Kratzern
- ▶ Materialverträglich

www.dekra-siegel.de

# RIM CLEANING KIT

The STARK® Rim Cleaner is an acid-free care product with high cleaning performance even in the case of very stubborn soiling and burned-on brake dust. Thanks to its efficient and compatible formula, the STARK® Rim Cleaner is excellently suited for polished, anodised or lacquered aluminium rims.

The kit includes three high-quality cleaning wipes as well as a wedge-shaped rim sponge with two different surface structures for an optimal application on rims. An „all-inclusive“ kit that does not require the user to make any additional purchase.

### Content:

- 1x 500ml Rim Cleaner in pump spray bottle
- 1x cleaning sponge with two different surfaces
- 3x high quality cleaning wipes

# COCKPIT CARE KIT

The STARK® Cockpit Care convinces with deep cleansing power and a long-lasting colour restoration on all cockpit surfaces. The STARK® Cockpit Care is in addition to plastic, rubber and vinyl, also excellently suited for lacquered aluminium, carbon or burl wood.

The kit includes three high-quality cleaning wipes as well as a cockpit sponge with two different surface structures for an optimal application.

### Content:

- 1x 500ml Cockpit Cleaner in pump spray bottle
- 1x special cockpit sponge with 2 different surfaces
- 3x high quality cleaning wipes

# INSECT REMOVER KIT

The STARK® Insect Remover is a care product with an extremely high effect in the case of very stubborn insect residues and contaminants. Thanks to its efficient and compatible formula the STARK® Insect Remover is also excellently suited for sensitive and high-quality surfaces (such as paint or polycarbonate headlights).

## Content:

- 1x 500ml Insect Remover in pump spray bottle
- 1x special insect remover sponge with 2 different surfaces
- 3x high quality cleaning wipes

# TURBO-GLOSS CARE KIT

The STARK® Turbo-Gloss Care is a 2-piece kit for the care, colour restoration and sealing of all gloss lacquers. It includes two specially impregnated shine care wipes and a high-quality micro fibre polishing cloth. The STARK® Gloss Care Cloth makes it possible to apply the sustained high-tech gloss care on the freshly washed vehicle, in only 10 - 15 minutes.

The veil that is thereafter formed can be polished off without much effort, with the included micro fibre polishing fleece. The lacquer-preservation lasts for at least 5 hand-washes.

## Content:

- 1x sachet with glossy care wipe
- 1 x micro-fibre polishing wipe

# HEADLIGHT RESTORATION-KIT

STARK® Headlight Restoration Kit: Old, turbid or yellowed plastic headlamps will be as good as new again – at a fraction of the cost incurred in the case of the replacement of the headlights. With the proven STARK® Headlight Restoration Kit, your headlights will once again be clear and transparent. All the necessary products such as polish, abrasive papers and sealer are included in the kit.

## Content:

- 1x 500ml glass cleaner, bottle with lid
- 1x sanding and polishing dice
- 4x polishing wipes
- 1x 50g tube headlights polishing
- 1x 30ml headlights coating in spray bottle
- 12x grinding paper in three fine grain sizes

# WHEEL & PLASTICS CLEANING KIT

The STARK® Wheel & Plastics Cleaning Kit cleans and takes gentle and effective care of your tyres and all rubber and unpainted plastic parts in the exterior of your vehicle. The colours are refreshed and protected against all climatic influences.

In the case of regular use, the treated surfaces regain their new matte appearance, without the usual annoying and unnatural high gloss effect. In addition, rubber seals are protected from cracking and premature aging and UV protection also reduces the colour fading of unpainted plastic parts.

## Content:

- 1x 500ml Wheel & Plastics Cleaner pump spray bottle
- 1x high quality cleaning wipe
- 1x micro-fibre polishing fleece
- 2x static wipes

## INGREDIENTS

The STARK® GmbH profits from the chemicals know-how and from the product and market experience of the Straubing team. Thanks to the products that are developed and extensively tested in the in-house laboratory, and which are to the most part also certified with best effect and minimal environmental impact.

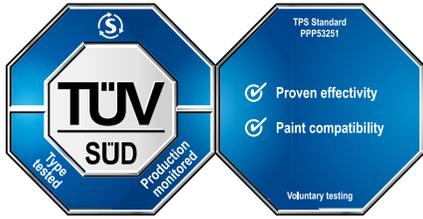

All our products already since the summer of 2014 meet the new CLP Regulation (Classification and Labelling regulation) that will

enter into force as of mid-2015. Our safety data sheets, pollutant tests and marketability attestations meet the most recent requirements and guidelines.

State of the art ingredients are the guarantee of performance and conservation of resources.

Currently none of our products must be marked with a hazard symbol.

**We are very proud about that!**

**MORE SAFETY. ADDED VALUE.**

Our product Scratch Remover for Automotive Paints received from TÜV Süd\* (technical inspection authority), among others a product quality seal that attests the „verified effectiveness“.  
**More is simply not possible!**

**THE CONSERVATION OF RESOURCES IS ONE OF THE ISSUES THAT WE TAKE TO HEART!**

Around 95% of the additionally purchased components are procured from German suppliers. Almost all of our bottles and plastic parts are produced in Bavaria. Short delivery routes means:  
**Conservation of the environment!**

# CERTIFICATES / REPORTS

In the area of the preparation of safety data sheets, marketability attestations and laboratory and benchmark tests, we work together with renowned testing institutes, among others with Fresenius, KFT and Dekra.

In the case of Dekra\* (German Motor Vehicle Inspection Association), a variety of our products have been tested and have been awarded a seal of product quality and performance. For example, the „Insect Remover, Cockpit Care, Rim Cleaner, Gloss Care Cloth, Scratch Remover for Automotive Paints, ...“

\* For more Information on the Dekra and TÜV quality seals, please refer to the detailed information on the products on the previous and following pages.

# WAREHOUSE AND ASSEMBLY

At the locations in Straubing, we dispose over modern warehouse and production areas. Fast logistics, efficient workplaces and an extensive machine park are a prerequisite for quality and adherence to delivery dates. Regardless of whether it involves samples, small quantities, individual pallets or large-scale operations with 500 or more pallets - corresponding production capacities guarantee punctual delivery.

# WAREHOUSE AREA

The magnificent Straubing is located right in the centre of Europe. With a location right next to the Danube River and direct access to the motorways A 92 and A 3 as well as B 8 and B 20, the Straubing harbour, the Munich Airport as well as the rail logistics in Regensburg, all traffic routes for deliveries to the whole world are open to us. Currently, we ship worldwide in over 50 countries in all continents by road, rail, air, water and sea.

Aerial view of the company building

Delivery

## FACTS AND FIGURES

- 5,000 sqm of production and warehouse space
- High-bay system and scanner logistics
- 500 sqm of modern office space and exhibition
- As well as over 1,000 sqm open space for swift truck loading and unloading

Loading and pick-up of finished goods

# CHEMICALS

With our in-house development and laboratory, we in addition to the external testing institutes also dispose over an internal quality assurance. Many of our products have hereby been developed and improved. The production works hand in hand with the research and development department. The latest technologies and customer requirements are implemented quickly and efficiently. The internal quality assurance is alongside the external testing institutes, also a guarantee for consistent quality.

# LABORATORY

With our graduate chemist Stefan Sarapuk at the top, our laboratory is well equipped for current and future tasks. The analysis of the ongoing production, as well as laboratory quantities of new products are among the daily tasks along with the implementation of legal provisions and voluntary tests in our thermal chamber, where the long-term effect is tested based on the „time-lapse effect“.

Stefan Sarapuk  
Graduate chemist

Osmosis plant

3,000 l, 5,000 l and 10,000 l tanks for the raw material mixtures

IBC container 1,000 l

Powder mixer

# BOTTLING AND DECORATION

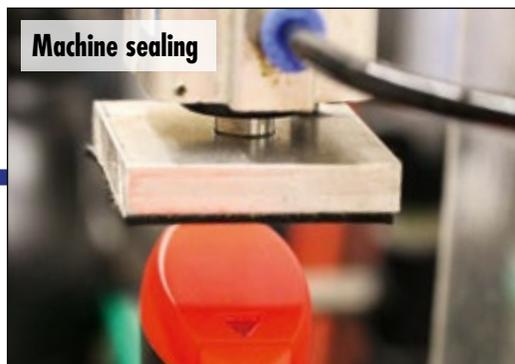

It is in essence from the mixture of the raw materials in mixing tanks of up to 10,000 litres in a tank, through to the filling and labelling, only a few meters distance to our 1,000 sqm production hall 2.

Regardless of whether it involves small quantities or large series - everything is possible over the shortest paths. The extensive machinery is serviced by our in-house technicians and is constantly being expanded. From the osmosis plant, over the mixing tank through to the filling and labelling equipment, we have everything in-house. Our working tools include among others, horizontal tubular bag filling, pad printing, foil welding, shrink tunnels and manual welders.

## FACTS AND FIGURES

- 1,000 sqm chemicals production hall, as of 2015 then 1,500 sqm
- 1 x 6-digit automated filling machine for containers of up to 750 ml
- 1 x 6-digit automated filling machine for containers of up to 1000 ml
- 1 x 4-digit automated filling machine for containers of up to 100 ml
- 7 x plants for semi-automated and manual filling
- 2 x automated capper
- 2 x Automatic labeller for double-sided bottle labelling + round bottles
- 1 x automated labelling plant for round bottles
- 2 x automated labelling plants for side or lid labelling
- 1 x automated horizontal tubular bag plant

# THE PATH OF A SINGLE SPRAY BOTTLE

# ADDITIONAL WORK

We can cover almost every requirement with our in-house machines. Only the tube-filling and the preparation of individual sachets is outsourced to external service providers. We hereby provide the raw materials and use the modern technology of our partners.

# THE PATH OF A SINGLE PACKAGING

**VEHICLE CARE AT  
THE HIGHEST LEVEL**

# STARK®

# SCRATCH REMOVER FOR ACRYLIC & PLEXIGLASS®

STARK® Scratch Remover for Acrylic and Plexiglass® easily and reliably removes scratches from cell phone displays, watch glasses, CDs and uncoated Acrylic and Plexiglass® parts of cars, motorcycles, caravans, boats, furniture, acrylic bathtubs etc.

**Content:**

- 1x 25g tube Scratch Remover
- 2x polishing wipes
- 1x sanding and polishing dice

## POLISHING CLOTHS

The STARK® polishing cloth provides for an absolutely streak-free shine after the polishing of your vehicle. Polish residue on the paint is completely taken-up and the high quality micro fibres provide for a radiant surface without streaks and stripes. The well-known cloud formation after polishing is completely removed and the paint shines in new splendour. This means real value preservation for your vehicle.

**Content:**

- 2 x micro-fibre polishing wipes

# DISPLAY CLEANER

The STARK® Display Cleaner convinces through optimum cleaning performance of all TFT, LCD and plasma displays, and through an additional antistatic effect. Thanks to its efficient and sophisticated formula, the STARK® Display Cleaner is a good choice for the cleaning of all display surfaces. The kit includes two static cleaning wipes and a micro fibre cleaning cloth and a special cleaning pad with a micro fibre side.

## Content:

- 1x 500ml TFT/LCD/LED Cleaner in pump spray bottle
- 1x cleaning sponge with two different surfaces
- 1x micro-fibre wipe
- 2x static cleaning wipes

# VEHICLE HIGH GLOSS POLISH

The STARK® Vehicle High Gloss Polish is an emulsion based solvent-free high-tech care. It contains natural carnauba wax and cleaning supportive polishing body. The STARK® Vehicle High Gloss Polish provides long lasting weather protection and high gloss along with an easy application.

# BICYCLE CLEANING KIT

The STARK® Bike Cleaner is a care agent with high cleaning performance even in the case of stubborn contaminants. Thanks to its efficient and compatible formula the STARK® Bike Cleaner is ideal for all bicycles. The kit also includes a special sponge and a high-quality micro fibre-polishing fleece.

## Content:

- 1x 500ml Bicycle Cleaner in pump spray bottle
- 1x special sponge wedge-shaped for cleaning the spokes
- 1x micro-fibre polishing fleece

# BICYCLE CHAIN CARE KIT

The STARK® Bicycle Chain Care Kit provides the possibility of increasing the service life and functionality of bicycle chains through regular cleaning. During the cleaning process, the innovative ingredients are transported directly into the chain. The active ingredients thereby provide for three concomitant effects in a single work step:

1. Cleaning of the chain
2. Oiling of the chain
3. Corrosion protection

The cleaning is done without having to completely degrease the chain. The concomitant oiling renders further work steps redundant.

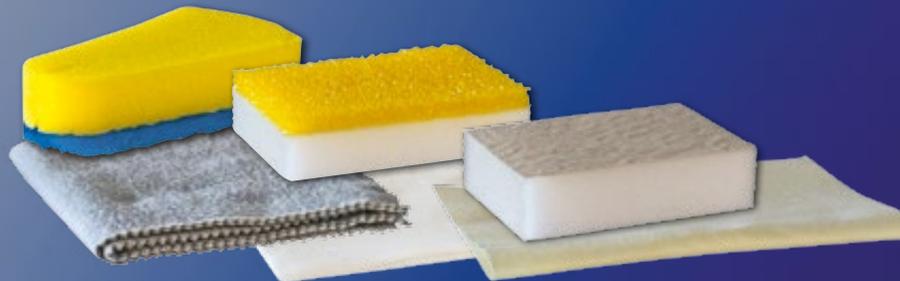

## Content:

- 1x 30ml cleaning and care emulsion in pump spray bottle
- 4x high quality cleaning wipes
- 2x protection gloves

OUR ENTIRE RANGE OF PRODUCTS  
IS ALSO AVAILABLE IN SINGLE BOTTLES!

ALL ACCESSORIES ARE ALSO SOLD SEPARATELY!

# THE KIT CONCEPT

We have continuously developed complete kits for our customers, in recent years. The sales as kits by far exceed those of individual bottles. The customer is thereby provided with accessories such as sponges, wipes and auxiliaries, which renders the application of any further products unnecessary.

Since these are times in which convenience products are increasingly attracting the interest of the customer, our kit solutions have as a consequence become a bestseller.

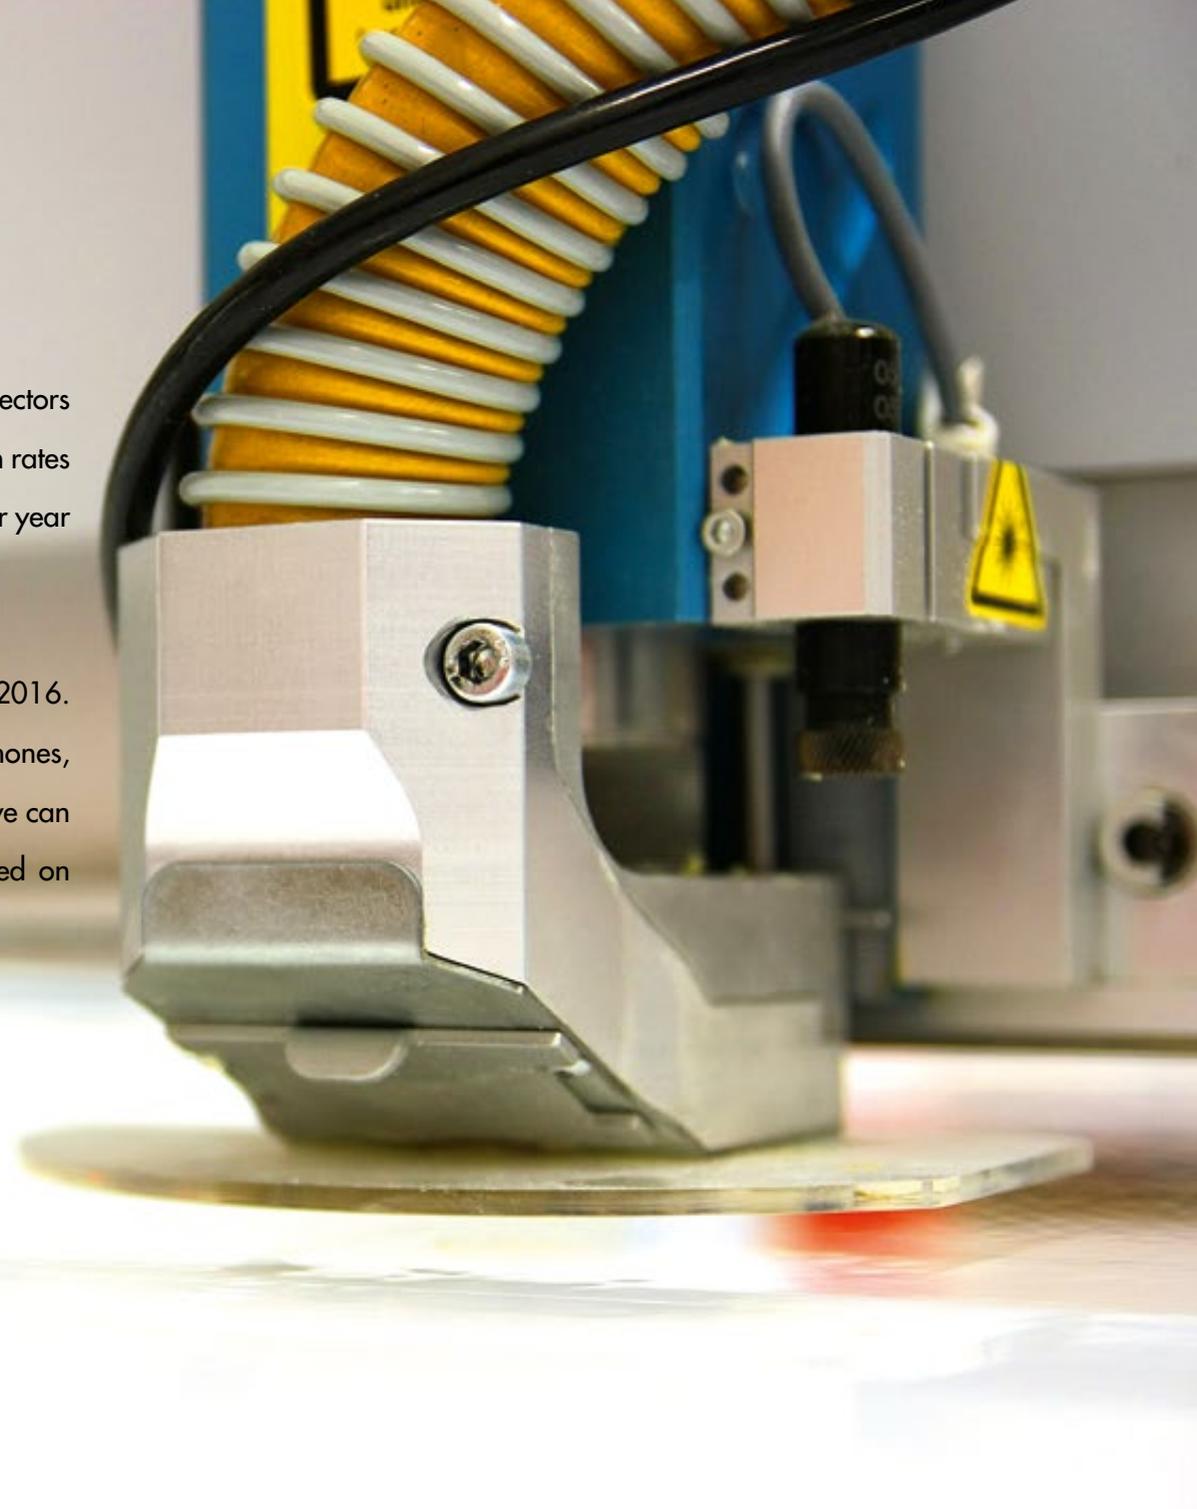

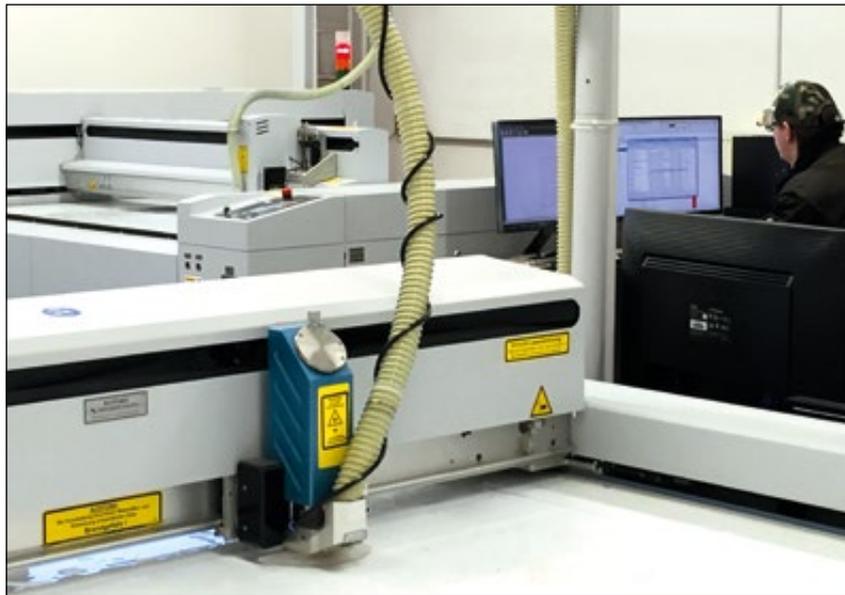

# SCREEN PROTECTORS

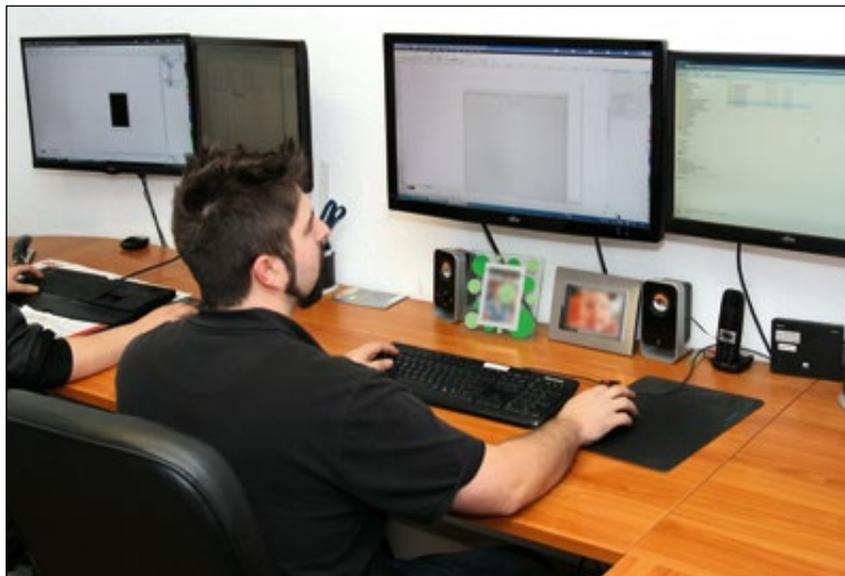

What has gone unnoticed by many is the fact that screen protectors have in recent years evolved to become a bestseller. With growth rates of over 50% per year, we today produce several million units per year for most brand providers.

Our goal is to crack the mark of 10 million units per year, in 2015/2016. Regardless of whether it involves cell phones, smartphones, tablets, navigation systems, cameras, game consoles or other, we can produce any size. The majority of the protectors are produced on modern laser systems.

LASER machines

The data for the cutting pattern are processed further in the office of the laser department

Punching machine

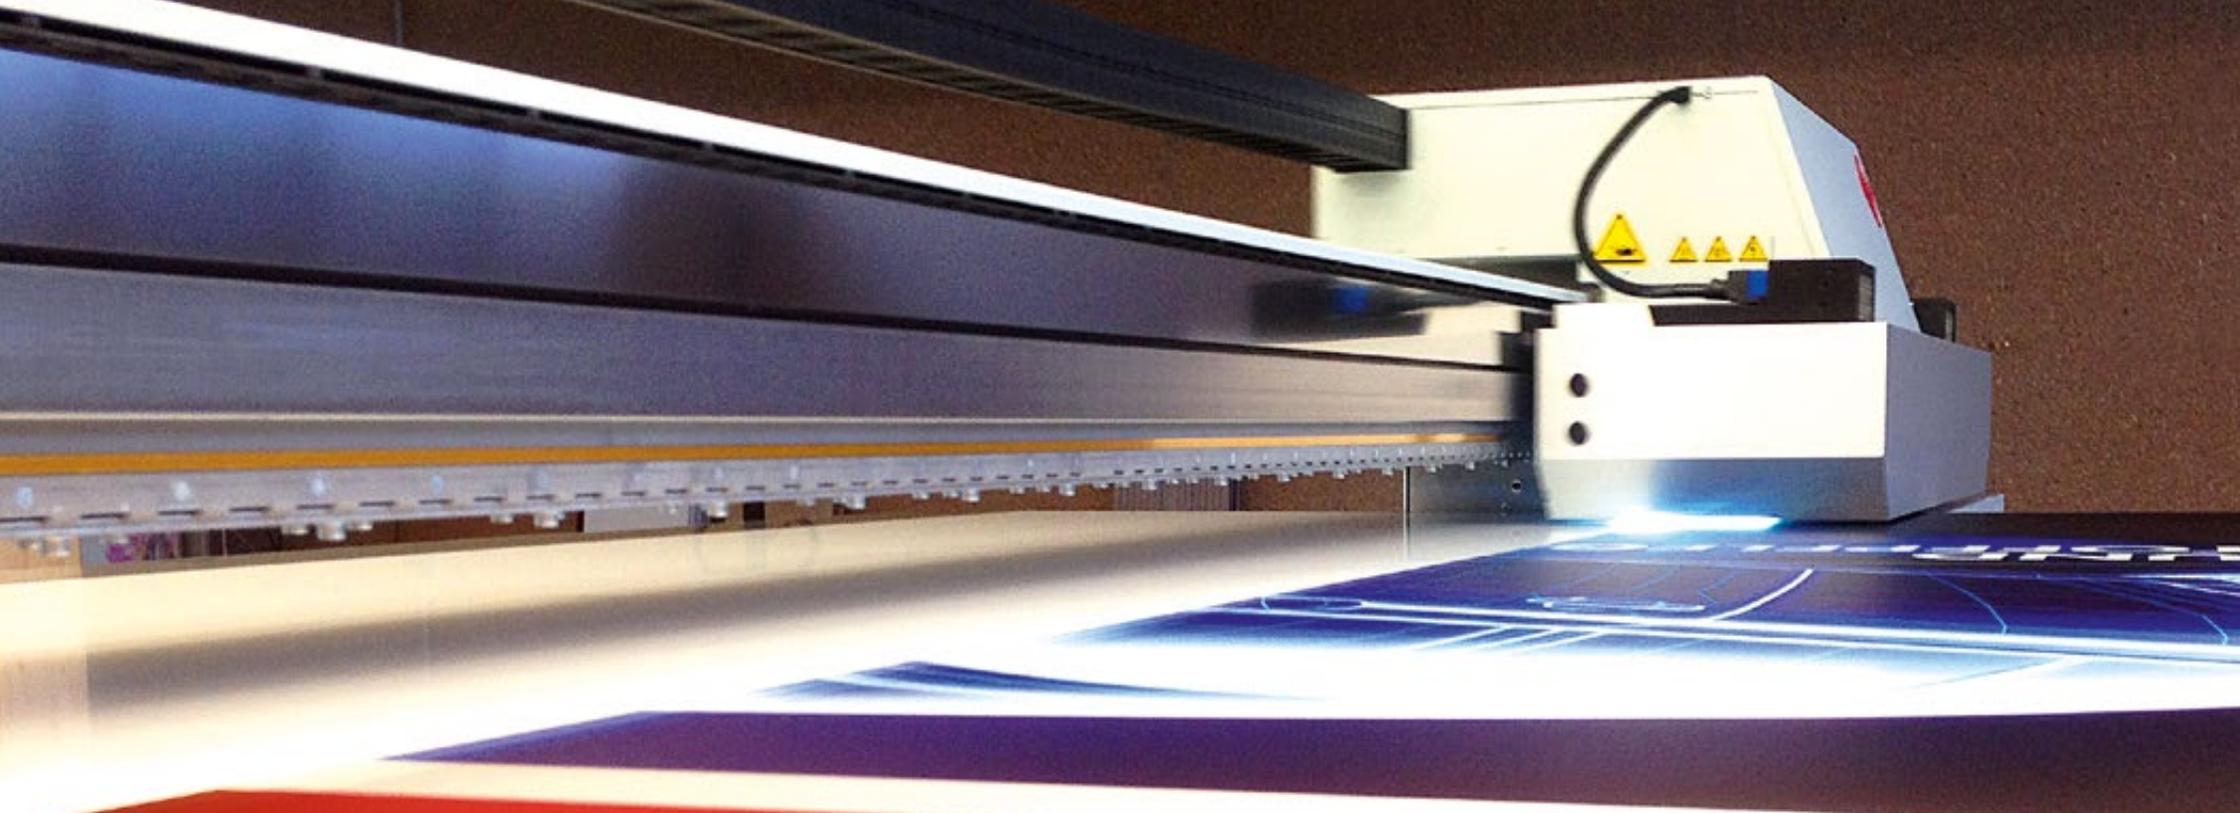

Plotter

Special films are however also produced on cutting plotters or punching machines. Our pattern system is extended by up to 10 models on a daily basis, so that our customers have access to thousands of contours.

We in the case of new models usually already have the protective films ready for shipment, weeks before the launch of the device itself. Two colleagues are focused exclusively on the creation of contours and are constantly in touch with the manufacturers and distributors. The production is carried out continuously in two work shifts.

# GRAPHICS DEPARTMENT AND DISPLAY CONSTRUCTION

Thanks to the luxury of an external graphics department staffed with four professionals on site and 3 further graphic designers externally, we are able to meet all requirements. We already as of the first piece, create your customised packaging, labels or displays. An extensive range of machinery

also allows for the production of large displays. We work with a printable area of 2,500 x 3,000 mm in the most modern digital UV print.

The further processing, through to milling, grooving and cutting, can also be carried out on our in-house CNC milling machine with a 2,500 x 3,000 mm machining area. We are also able to produce the labels in-house, in a volume of up to a maximum of 10,000 pieces, in highest digital quality. We take care of all your wishes from one source, from the conception, over the graphics through to the website and social media.

CNC milling - machining centre – 2,500 x 3,000 mm

- Digital direct print with UV, up to 8-colours and 2,500 x 3,000 mm in size
- Milling, plotting, grooving, cutting on a modern plant, with up to 2,500 x 3,000 mm in one piece
- Digital printing of labels on a modern label processing machine for all forms of labels, however with a maximum of width of 210 mm and max. length of 130 meters
- 5-colour pad printing plant

- The latest hardware and software for the design
- High Performance - digital photo and film equipment for product photos and video
- Various laser printers and finishing equipment

**FACTS  
AND FIGURES**

# PRIVATE LABEL

In order to be able to print small quantities starting with 1 piece and small series of up to 10,000 pieces, effectively and quickly, we set up a small in-house printing press, at the end of 2014. We can print any shape as a label in the best digital quality, from raw material in the starting dimensions of 200 mm width and 130 meters length.

The labels are then provided with the relevant contours on the successor unit. The roller conveyor is cut longitudinally and transversely as required and the labels for the labelling machine accordingly weeded and rolled up.

# PRINTING OF LABELS AND PACKAGING

We work together with our long-time partner, the company Weisert & Daur, in the case of the large editions. We annually produce several million copies of our own packaging as well as the packaging of customers, over the latter. On account of our huge annual quantities, you as a customer can always benefit from the price advantage that thereby results.

On the large-format plant, a radian measure of 1020 x 1420 mm is processed in a 6 pcs offset print. 6 printing colours and coatings,

in addition to the options for UV, provide for the creation of high-gloss lacquer surfaces through to matt-gloss effects. Special OPP (oriented polypropylene) laminated film surfaces or additional imprints of writing, pictures or contours also ensure more finishing options.

Production hall Weisert & Daur

# IN-HOUSE MOULDS

As a manufacturer with a large vertical range of manufacture, we also have our own tools for plastic parts that we predominantly arrange to be spouted, extruded and blown in Bavaria.

In the case of our new 500 ml bottle, whose design also comes from our company, we arranged for a new tool to built, in 2014. We can hereby also attach the customised company logo on the front side of the bottle during the production. By default, you will find our STARK-Logo. We however also have bottles without a logo. Different colours of the bottle are at any time possible.

For years, we supply various plastic boxes e.g. for the product Scratch Remover for Vehicle Paints, or the 30 ml bottle box as a product package. You can find these products at major discount actions worldwide. We in part produce over 1,000,000 pieces each season.

Of course, we also have a range of in-house plastic blister, which are tailored to our bottles and tubes (left).

# AND WE PRODUCE EVEN MORE

Regardless of whether it involves individual packaging, table displays or large stand and pallet displays, we produce everything up to a final format of 2500 x 3000 mm in one piece - in the print and processing. And this is not solely on cardboard material, but also on, for example plexiglass, aluminium composite tops, foam boards and much more. All this takes place here in Straubing.

Large format image: 2500 x 5000 mm

We also supply you with any kind of POS materials - from customer stoppers through to illuminated displays or company advertising signs. Large signs with sizes of 10.0 x 3.0 meters or larger are also possible. Regardless of whether it is two or three dimensional, we offer everything from one source. Also video production, 3D renderings, websites and social media.

## FROM THE IDEA THROUGH TO THE FINISHED PRODUCT

We implement your ideas and conceptions - from the graphics through to the finished product. In urgent cases, the design and sample packaging is also possible within 24 Hours.

# PRIVATE LABEL

Our universal case was also completed, at the end of 2014. With our in-house tool, we are able to realise our mould specifications and above all at a low production price, since the usual stage of upstream suppliers is hereby omitted. The case can be filled with various inner workings and products. Ideal as a **private label**, since bottles with a label, inner workings and case presentation are already offered as of **48 pieces**.

In the case of, our case and boxes, we also manufacture foam inserts or inserts made of cardboard and special materials, on our in-house facilities. A lot of materials can as such additionally be printed in advance. In the case of quantities over 10,000 pieces, we arrange for the inserts to be produced externally.

# YOUR CUSTOMISED LABEL - ALREADY AS OF 48 PIECES!

- ✓ PROFESSIONAL
- ✓ FAST
- ✓ COST EFFECTIVE
- ✓ AS OF 48 PIECES

# SERVICES FOR ALL

Take advantage of our service offering. We produce, assemble and package your products. Our services Service-Team also processes third-party products of all kinds.

## REPACKAGING AND ADDITIONS TO THE PACKAGING

Do you need to repackage the product or add something to the package? We will handle it for you - fast and cost-effective.

## COMPLEMENTS AND LABELLING

We complement your kit with our own products or third party products. Are instructions or labelling missing? No problem - we correct this for you.

## FROM SMALL QUANTITIES THROUGH TO LARGE-SCALE ASSIGNMENTS

Your services are usually processed by our Service-Team. We have additional personnel resources at our disposal at short notice, in the case of large-scale assignments.

## PERMANENT INSTALLATION AND SERVICES

We take care of your installations over the long term, over our additional Long-term-Team. Regardless of whether this involves drilling, the assembly of components or simply the packaging.

## FROM LOGISTICS THROUGH TO DROP-SHIPPING

We take care of your entire logistics through to the delivery of customised packages – along with your documents - directly to your customers.

## BOTTLING AND LABELLING

We bottle your product and label it for you.

## MACHINERY AND SERVICES

Take advantage of our machinery for your products.  
From the design through to the finished product - We provision this.

## OUR PROCUREMENT-SERVICE

Take advantage of our contacts. We are able to procure for you a lot of products, packaging, machines and accessories

**OUR  
SERVICES**

# RESEARCH AND DEVELOPMENT

Responsibility for people and the environment are not only advertising slogans, but are also reflected in our actions. You will not find hazard symbols on any of our own chemical products, because we do not use these substances in our products.

Almost a year before the new CLP Labelling Directive, which will enter into force as of mid-2015, we have nevertheless already implemented all the requirements - from chemicals over the packaging through to the safety data sheets.

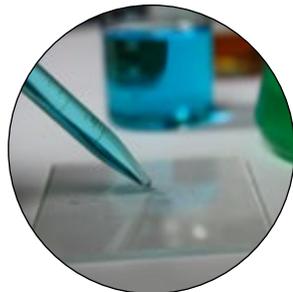

Through constant market observation and laboratory work we protect the environment and provide you with the best possible and reasonable products, from which you can derive the utmost pleasure as the customer. We entirely refrain from the use of unnecessary additives such as fragrances, colouring or pseudo additives.
