

IN THIS ISSUE

- Happy New Year
- CCM New Top Seller Catalogue
- Carpet Coating Solutions
- Scratch Protection for Metal Smartphone Backs
- Liquid Glass Stone Coatings for Your Home
- Liquid Glass Coatings for Luxury Accessories
- PFAS-free Liquid Glass coatings

HAPPY NEW YEAR

We wish you a successful New Year and a strong start to 2026.

This image illustrates what defines our work: advanced Liquid Glass coating technology that delivers reliable protection and excellent water repellency – even on natural surfaces. True to our motto, “We coat almost everything,” we continue to deliver performance, durability, and trust worldwide.

We look forward to supporting your projects with innovative coating solutions in the year ahead.

CCM® TOP SELLER CATALOGUE

New CCM “TOP SELLER” Product Catalogue Now **Available for Download**

Across 84 pages, the catalogue presents CCM’s best-selling solutions, including Liquid Glass Coatings, long-term disinfection products, as well as bio-based and specialty cleaners.

687 CARPET COATING

687 Carpet Protect is an aqueous, room-temperature curing impregnation for textiles (PES, cotton, PA and blends) that provides hydrophobic (water-repellent) and oleophobic (oil-repellent) properties. The penetration of water, dirt, coffee, cola, ketchup, red wine, and more is significantly reduced, making coated surfaces easier to clean and maintain.

STOP SCRATCHES ON MODERN METAL SMARTPHONE BACKS

Modern smartphones with painted, anodized, or metallic backs look premium and sophisticated — but daily use quickly reveals that these attractive finishes are easily damaged. Keys, coins, and other hard objects carried in pockets or bags cause scratches, wear marks or fine scuffs. These small imperfections diminish the elegant finish and can make even brand-new devices appear used far too soon.

Devices featuring colored anodized layers are particularly affected. On sharper edges — especially around the camera module — the thin colour layer is often less robust, meaning normal everyday handling can be enough to wear down the coating and expose the metal beneath.

PROTECT YOUR HOME WITH CCM® LIQUID GLASS STONE COATINGS

Whether on façades, driveways or terraces, stone and concrete/mineral surfaces are exposed to weathering and contamination every day. Our Liquid Glass stone coatings create an ultra-thin, invisible protective layer that prevents water penetration and significantly reduces algae growth, oil stains, barbecue residue and many other types of contamination. We also offer slightly visible coatings that enhance the natural colour of stone while providing protection against graffiti, oil, and aggressive chemicals.

Would you like to learn more about how our stone coatings work and what benefits they offer?

DID YOU KNOW? LIQUID GLASS PROTECTION FOR YOUR LUXURY ACCESSORIES

Our ultra-thin SiO₂ coatings also provide reliable, invisible protection for (faux) leather. Whether it's exclusive handbags, wallets, business bags, belts, or shoes — your favourite items gain a refined, long-lasting protective layer that helps preserve their beauty and value for years to come.

PFAS-FREE LIQUID GLASS COATINGS

From October 2026, the EU will prohibit certain PFAS substances (such as PFHxA) in various consumer products. Industrial applications (e.g. membranes, special filters, and vehicle interiors) may also fall under a broader PFAS regulation expected as part of the upcoming REACH revision, still under discussion.
