

## IN THIS ISSUE

- NEW: Hydrophilic Glass Coating
- PFAS-free coatings for filtration media and membranes
- Bio Cleaner for Photovoltaic and Solar Systems
- Natural Cleaning - Also Suitable for Dishwashers
- CCM® 7665 Aircraft Dry Wash & Polish
- PFAS-Free Liquid Glass Coatings

### NEW: 7603 HYDROPHILIC GLASS COATING

**CCM® 7603 combines advanced SiO<sub>2</sub> and TiO<sub>2</sub> nanotechnology** to provide long-lasting surface protection and enhanced self-cleaning performance. Its hydrophilic properties allow water to form a thin, uniform film that helps wash away dirt, reduces water spots, and keeps surfaces clean for longer. Ideal for solar panels, glass facades, windows, conservatories, mirrors, ceramic surfaces, and other mineral substrates.

### PFAS-FREE COATINGS FOR FILTRATION MEDIA AND MEMBRANES

Increasing regulatory requirements concerning PFAS, PFOS, PFOA and PFHxA are creating new challenges for manufacturers of filtration media, membranes, stainless steel mesh and other porous materials.

In many applications, hydrophobic and oleophobic properties are essential for maintaining product performance. At the same time, manufacturers need to evaluate existing surface treatments and assess their long-term regulatory viability.

CCM supports manufacturers worldwide with advanced surface technologies that provide hydrophobic and oleophobic properties for metals, stainless steel meshes, membranes, technical nonwovens and other porous materials.

### CLEAN MODULES. EFFICIENT ENERGY GENERATION. SUSTAINABLE CARE.

#### Biosativa® Bio Cleaner – Biological Cleaning for Photovoltaic and Solar Systems

Many operators of photovoltaic and solar systems assume that rain automatically keeps their systems clean. However, in practice, residues often remain: fine dust, pollen, bird droppings, tree sap as well as deposits from agriculture, traffic and industry can accumulate on the surface over time.

The more sunlight reaches the solar cells, the more energy a photovoltaic system can generate. Contamination on the module surface can reduce light transmission and therefore affect the performance of the system.

### NATURAL CLEANING – ALSO FOR DISHWASHERS

More and more consumers are rethinking conventional dishwasher tabs and looking for more sustainable alternatives for everyday household cleaning. Topics such as biodegradability, reduced packaging, flexible dosing and more conscious use of cleaning products are becoming increasingly important. Against this background, another application area for Biosativa® Bio Cleaner is gaining attention: its use in dishwashers as an alternative to conventional dishwasher tabs.

### CCM® 7665 AIRCRAFT DRY WASH & POLISH

Efficient care for aircraft surfaces – fast, easy and gentle on materials: With **CCM® 7665**, you can clean, polish and protect surfaces without water in a single step. Insects, soot

and environmental deposits are removed effortlessly, leaving a smooth, dirt-repellent finish.

### PFAS-FREE LIQUID GLASS COATINGS

Starting in October 2026, new EU restrictions on certain PFAS substances (such as PFHxA) will come into force in various consumer products. Industrial applications (e.g. membranes, special filters and vehicle interiors) may also fall under a broader PFAS regulation expected as part of the future REACH revision, which is still under discussion.

### CCM® TOP SELLER CATALOGUE

#### CCM®'s "TOP SELLER" Product Catalogue **Available for Download**

Across 84 pages, the catalogue presents CCM®'s best-selling solutions, including Liquid Glass Coatings, long-term disinfection products, as well as bio-based and speciality cleaners.

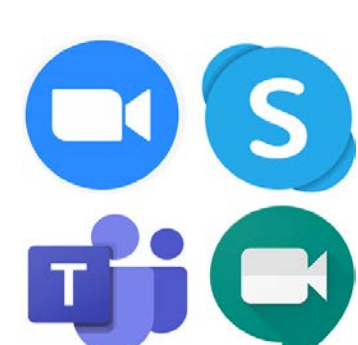

### SAMPLE ORDERS - GIVE IT A TRY!

#### REQUEST YOUR SAMPLES – TEST OUR PRODUCTS

We are happy to provide sample quantities so you can test our products in real-life applications.
