- NEW: 8650 – The Next Generation of Professional Ceramic Coating
- Anti-Fog Season Starts Now
- NEW: 7603 Hydrophilic Glass Coating
- NEW: 2127 BIOSATIVA® Drone Clean Concentrate
- Getting Ready for Our 20th Anniversary

LIQUID GLASS TEXTILE COATINGS

From 10 October 2026, new EU limits will apply to certain fluorinated substances used in water-, oil- and dirt-repellent coatings, among other applications. Specifically, the new rules concern

PFHxA and PFHxA-related substances, which may be relevant in certain existing C6 technologies.

NEW: 8650 PERMANENT PRO EASY ON – THE NEXT GENERATION OF PROFESSIONAL CERAMIC COATING

Introducing **8650 Permanent Pro Easy On** – combining professional performance with exceptionally user-friendly application.

More time. More control. Less stress.

Up to 5 minutes of working time for greater control – and a finish that impresses: brilliant gloss, intense colour depth, exceptional surface smoothness and impressive water beading.

Professional ceramic coating, taken to the next level.

Available from October 2026.

EXPLORE ALL CCM® AUTOMOTIVE COATINGS

SEASON START: ANTI-FOG

As temperatures drop, demand for reliable anti-fog solutions increases.

CCM® Anti-Fog is suitable for glass and plastic surfaces, including eyeglasses, safety glasses, sports eyewear and helmet visors. The treatment reduces fogging on coated surfaces and helps maintain clear vision in changing temperatures and high humidity.

Autumn and winter are the peak seasons for anti-fog products – a good time to plan your stock accordingly.

NEW: 7603 HYDROPHILIC GLASS COATING

CCM® 7603 combines advanced SiO₂ and TiO₂ nanotechnology to deliver long-lasting surface protection and enhanced self-cleaning performance. Its hydrophilic properties allow water to form a thin, uniform film that helps rinse away dirt, reduces water spotting and keeps surfaces cleaner for longer. Ideal for solar panels, glass facades, windows, conservatories, mirrors, ceramic surfaces and other mineral substrates.

NEW: BIOSATIVA® DRONE CLEAN CONCENTRATE

The increasing use of professional drone cleaning systems is transforming the way buildings, infrastructure and industrial assets are maintained. Modern cleaning drones enable safe, efficient and cost-effective cleaning of surfaces that are difficult or dangerous to access using conventional methods. To fully realise these advantages, the cleaning solution must meet requirements that go far beyond those of conventional cleaning agents.
