

Coating of “Adriatic Europe 1” Sailing Boat

The “Dusan Puh Sailing Team” is a highly respected and successful sailing team from Slovenia.

Their high performance 19m yacht was recently coated with “Universal 673”, on the hull, topsides, rudder and propeller.

Our range of ecologically benign technologies are ideal for use within the marine sector, and we, like those behind the Dusan Puh project, recognize that “we only have one planet”.

In good company.

After being coated with our technology Nigel Lamb won the Red Bull Air Race Championship for Breitling in 2014.

We wish the Dusan Puh team good luck and fair winds.

The CCM Team
