

Pizza Oven – Clean & Coat Project

Total time for this project: 30 minutes

Equipment needed: BLU1000 Stainless Steel Cleaner, Microfibre, 2ml of 640 Permanent Protect, rinsing water or IPA (alcohol), paper towels.

A well used pizza oven...
this soiling was solidly baked on...
look at the chimney!

20ml of BLU1000 Stainless Steel Cleaner and a medium grade microfiber was then used to clean the pizza oven. The cleaning took 20 minutes.

Cleaning with Blu1000 Stainless Steel Cleaner...
it took 2-3 minutes to clean this front panel.

This chimney was harder to clean. 6-7 minutes... but
exceptionally clean after using BLU 1000

After rinsing with water and wiping with IPA (alcohol),
the unit was ready to coat with 640.

Not cleaned and coated,
for long term evaluation

Cleaned with Blu1000,
coated with 640.
