

Bacoban®
Long-Term Surface Disinfection
for up to 10 days
Special offer
(as long as stocks last)

Product information and videos

Bacoban® is the perfect technology for use by individuals and by large organisations when tackling contaminated surfaces.

The World Health Organisation recognises that the next pandemic will probably be via Influenza. Bacoban® is ideally suited to address this type of contamination.

Eradicates a vast range of pathogens. Ebola/Mers/Corona/ Influenza.

Creates a protective layer which lasts for up to a year on many surfaces.

Easy to apply. No special equipment is required. Massively durable

(withstands thousands of wiping actions). It is lower in cost than most sanitisers which are only effective for a matter of seconds.
