Summer time - Barbecue time

7620 Stone Coating for barbecue areas

This coating is designed to penetrate deep into the structure of the stone.

After it has become established in the stone it provides strong hydrophobic and oleophobic protection.

Specifically developed for natural stone and cementitious surfaces such as sandstone, limestone, travertine, concrete, pavers and brickwork.

It is hydrophobic (water repellent) and oleophobic (oil repellent). This long lasting stain protection is easy to apply and is ideal for protecting BBQ areas.
