

Bacoban® Update: New Tests available

New tests are available for Bacoban® long-term surface disinfection:

- Bacoban® antiviral effect on textiles acc. ISO 18184
- Bacoban® suitable for the veterinary area
- VAH registration for Bacoban® WB prolonged
- Bacoban® WB biodegradable acc. to OECD 301B
- Bacoban® FDA-registered in Thailand
- Bacoban® receives registration in Brasil

CCM Liquid Glass Stone Coatings

Our Best Seller: 7620 Penetrative Stone Coating

PENETRATIVE - FOR 10-20 YEARS

This coating is designed to penetrate deep into the structure of the stone.

After it has become established in the stone it provides strong hydrophobic and oleophobic protection. Specifically developed for natural stone and cementitious surfaces such as sandstone, limestone, travertine, concrete, pavers and brickwork.

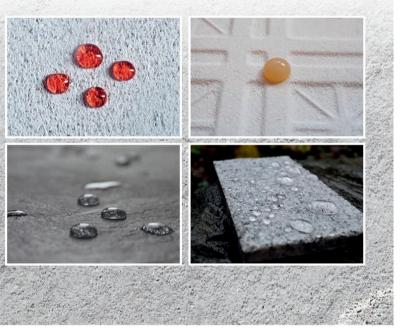

This coating will remain highly effective for approximately 10-20 years.

Stone Coatings is online. Stone Coatings

www.ccm-international.eu

We offer a range of outstanding coatings for stone.

These range from nano scale water based coatings (ideal for protecting monuments and shower rooms) to our micron scale coatings which offer world leading levels of protection for marble and high traffic areas.

Please contact us if you need guidance about your specific stone coating needs.

CCM Coating for Solar Panels / PV

Photovoltaic modules produce their best yield under optimal conditions. With our special coating, the amount of light transmittance to the PV cells increases. Cleaning becomes much easier, and the cleaning cycle requirement is significantly extended. These factors lead to an increased yield of your system.

PROPERTIES

- Advanced SiO2 technology which creates an invisible protective layer, approx. 100 nm (nanometres) "thick". Approximately 500 times thinner than a human hair, therefore no negative impact on light transfer.
- Protects the surface against abrasion and degradation
- Heat and frost resistant
- Resistant to sea water, and acid / alkaline 1.5 to 12.5 ph
- Water and dirt repellent
- Easy and quick application
- Can be applied at +10° to +30°C
- UV-stable
- "Easy-to-clean" effect (surfaces become easy to clean = time and cost saving. Heavy surface soiling is often washed off by rain)
- Coverage: Approx. 150m² with one litre
- Reduces the negative ecological (CO2) footprint when cleaning:
 - Less water is needed
 - Zero Chemical cleaning

COMPLETE SET FOR PV INSTALLATIONS UP TO 70 M²

CONTENT

- 500 ml Biosativa® Bio-Cleaner Concentrate 1:10 for pre-cleaning
- 1.000 ml Isopropanol Alcohol 99,9% for degreasing
- 500 ml Liquid Glass Coating 7601 (for appr. 75-100 m²)
- 100 dry wipes 25 x 16 cm for pre-cleaning
- 10 micro-fibre wipes 10 x 10 cm for application
- 5 micro-fibre wipes 30 x 30 cm for polishing
- 10 one-way gloves
