

## CCM® Liquid Glass Stone Coatings

OUR BEST SELLER - OUR BEST SELLER - OUR BEST SELLER

### 7620 Stone Coating penetrative

This coating is designed to penetrate deep into the structure of the stone.

After it has become established in the stone it provides strong hydrophobic and oleophobic protection.

Specifically developed for natural stone and cementitious surfaces such as sandstone, limestone, travertine, concrete, pavers and brickwork.

### 704 Multi Stone

704 Stone is an exceptionally durable coating which is designed for mineral surfaces like concrete, plaster, natural stone (granite, slate, basalt, sandstone, limestone), roof tiles, clinker, and other absorbent substrates. Examples for use are application to concrete walls and facades, unglazed roof tiles and flag stone. It can also be used for coating wood which is used in interior applications. This coating provides total protection from graffiti and staining from domestic soiling agents such as red wine, olive oil etc..
