

CCM NEWS JUNE 2020

Good day from Overath,

We hope you are well and remain healthy, having experienced this extraordinary period.

As a manufacturer of disinfectants, we have encountered truly exceptional demands which no one could have anticipated.

Today we would like to give you a brief overview of the products which are currently available.

We would like to thank you for your trust and we thank you for your continued understanding if, in some instances, our distribution processes take a little longer than usual. We have been working 7 days a week in order to ensure that we are able support our partners as we recognise that we are all part of a team.

If you are interested in our technologies please contact us by e-mail and we will get back to you as soon as possible.

Kind regards,

Bernd Zimmermann, Heiner Perk, Neil McClelland, Gerd Zimmermann & the CCM team.

MediSeptic EverClean Touchless Hand Disinfection

With EverClean, MediSeptic has developed in cooperation with its technology partner HTG a highly innovative device that enables touchless hand disinfection. It ensures even application and thus maximum protection. In combination with the MediSeptic Antiseptic A50 for the first time in the history of hand disinfection it is possible to offer complete and lasting protection for 2 hours within seconds. This is especially critical in times of pandemics, but also for the ongoing prevention of new infections through cross-contamination in all areas of public life. These include retail, businesses, schools and universities, airports and train stations, football stadiums, fitness studios and many more.

- Touchless hand disinfection
- Electronic monitoring
- Animated operating instructions
- CE/UL marking
- Battery or mains operation
- Voice guidance via integrated loudspeaker
- 15,6" display
- Camera guided coating
- Real-time hand recognition
- USB storage and Bluetooth
- GSM and WLAN capable
- Optional playback of advertisement
- Motion sensors
