

NEW PRODUCTS 2025

Greetings from Overath,

We hope you had a great start to the new year!
2025 brings exciting news: Over the past year, we've been hard at work developing innovative new products – and now they're ready for you!

Our highlight: **Liquid Glass PFAS-free solutions**. With growing demand for sustainable alternatives, we're proud to meet this urgent need with products designed for the future. Of the **41 Liquid Glass coatings listed on our website**, **26 are already PFAS-free**, while the remaining ones are PFOS and PFOA-free.

What sets us apart? We also offer **PFAS-free coatings that are still oil-repellent** – a unique feature in the market! Examples include **7675** for glass and metal surfaces and **673** for plastic, metal, ceramic and painted surfaces and our micron range **"Pro Coatings"**.

And there is yet more good news: Despite challenging times, we've managed to keep the prices of our existing products stable. **Feel free to request your customized net price list here.**

We look forward to a successful year together and are excited to help drive your success. If you have any questions, we're always here for you!

Warm regards,
Your team at CCM GmbH

NEW: 7624 ACTIVATED STONE COATING

7624 Activated Stone Protection is an innovative $\text{SiO}_2+\text{TiO}_2$ coating with powerful protection:
Photocatalytic action: Reduces air pollutants (H_2S , NO_x , Ozone, VOCs) and degrades organic stains.
Anti-mould shield: Prevents algae, moss, and lichen growth.

NEW: 693 WOOD PROTECTION NATURE

693 CCM® Wood Protection Nature is a ready-to-use silane-based impregnation system. It stabilises the lignin and thus significantly protects the wood from greying. Its hydrophobic properties prevent unwanted moisture and dirt from being absorbed into the wood.

NEW: 7601 GLASS COATING, NEW WATER-BASED

7601 Glass Coating: Now Available in Alcohol- and Water-Based Versions

Our top-selling **7601 glass coating** is now available in a **new water-based formula** alongside the original alcohol-based version.

Why offer two versions?

Regulatory changes in some countries, such as Canada, have introduced stricter **VOC limits**, making it difficult to import products like the alcohol-based 7601 with an alcohol content of over 94%. Additionally, the alcohol-based coating can be challenging to apply in warmer climates due to its rapid evaporation, which led us to develop a more versatile water-based alternative.

Key differences:

- **Ease of application:** Both versions are simple to apply, but the water-based formula evaporates more slowly, offering extra flexibility during application.
- **Durability:**
 - Alcohol-based: Lasts **3-4 years** on glass surfaces.
 - Water-based: Lasts **2.5-3 years** on glass surfaces.
- Both versions are ideal for glass and ceramic surfaces, including windshields.

NEW: 8654 CAR COATING AS 1:1 CONCENTRATE

Our **water-based automotive paint coating 8654** is now also available in a **1:1 concentrate version**.

This option is particularly appealing to our **industrial customers abroad** who have the capability to handle on-site bottling.
