

KITCHEN COATING

Commercial kitchens in Reykjavík / Iceland, coated with 640 Permanent Protect

The mission was to create a kitchen facility which remains easy to clean for a prolonged period.

640 creates an attractive, high gloss finish.

KITCHEN COATING

Fingerprints fats and all kitchen soiling can be removed with water within seconds.

The 640 coating is ideal for fat fryers as it withstands temperatures over 650°C.

KITCHEN COATING

There are few coatings which withstand application to hot plate areas.

The 640 coating is food safe and massively durable and so it is ideal for all kitchen surfaces.
