

CCM Sneaker & Sole Cleaner

Quickly and effectively cleans the smooth surfaces and soles of sneakers and similar shoes.

Features:

- Very easy to use
- Cleans stubborn dirt, stains and streaks quickly and effectively
- Restores the old white
- No graying of soles and caps due to frequent cleaning
- Water-based, not a hazardous substance
- Contains no chemical solvents and no aggressive or abrasive substances
- 98% biodegradable
- pH skin neutral
- Dermatest seal "very good" (skin test)
- Made in Germany

How it works:

The fluid cleans physically - microscopically small bubbles, which move up to 8,000 times per second, infiltrate the dirt and dissolve it in tiny fragments. At the same time, a micro-fine film forms on the surfaces and inhibits the adhesion of new dirt. The dirt can then be removed with a microfiber cloth or washed off under water, similar to an ultrasonic bath.

Application:

Smooth materials and sole edges: Spray on the material and leave to work for 60 seconds. Then wipe off with a cloth. Not suitable for textiles and textile shoe materials.
