

8650 PERMANENT PRO EASY ON

PROFESSIONAL CERAMIC COATING – EASY TO APPLY

PROFESSIONAL TECHNOLOGY. SURPRISINGLY EASY TO APPLY.

8650 combines professional ceramic protection with controlled, user-friendly application. The PFAS-free coating enhances gloss and colour depth while creating a pronounced easy-to-clean effect.

113°

WATER CONTACT ANGLE

Strong water beading and reduced surface wetting.

UP TO 5 MINUTES

WORKING TIME

More control and a lower risk of high spots.

LONG-LASTING

SURFACE SLICKNESS

Silky-smooth finish, intense gloss and easier maintenance.

UP TO 72 MONTHS

LONG-TERM PROTECTION

With proper preparation, application and maintenance.

**ONLY APPROX. 20–25
ML**

per average-sized car with
professional application

LASTING PROTECTION FOR EVERYDAY DRIVING

The ceramic barrier layer makes it easier to remove typical contamination such as insect residue, tree sap, brake dust, tar and road salt.

CONTROLLED APPLICATION – MORE TIME, LESS STRESS

The generous working time of up to 5 minutes facilitates even buffing and can reduce the risk of visible coating residue and time-consuming rework.

1 PREPARE

Thoroughly clean the surface, correct paint defects and completely degrease.

2 APPLY

Apply 8650 thinly and evenly section by section using a suitable applicator.

3 BUFF OFF

Buff off within up to 5 minutes using a clean microfiber cloth.

POWERFUL PERFORMANCE. HIGH EFFICIENCY.

Only approx. 20–25 ml per average-sized car with professional application. The transparent, virtually invisible protective layer bonds firmly to the substrate and supports a long-lasting, smooth and easy-care surface.
