

8650 PERMANENT PRO EASY ON

PROFESSIONAL CERAMIC COATING – SIMPLE TO APPLY

8650 delivers professional paint protection with exceptionally controlled performance and user-friendly application.

The generous working window gives the user more time for an even application and a flawless finish.

The result impresses from the very first moment: intense color depth, brilliant gloss, exceptional surface smoothness and a pronounced beading effect – for a finish that looks amazing and feels incredible.

113° WATER- CONTACT ANGLE

Strong hydrophobic effect with outstanding beading.

LONG-LASTING SURFACE SMOOTHNESS

Silky-smooth finish, intense gloss and easy maintenance.

UP TO 5 MINUTES WORKING TIME

More control and less risk of high spots.

LONG-LASTING PAINT PROTECTION

Transparent, highly durable coating with strong surface adhesion.

APPROX. 25–75 ML PER VEHICLE

Depending on vehicle size for professional application.

LONG-LASTING PAINT PROTECTION IN EVERYDAY USE

The highly resistant coating reduces the adhesion of typical contaminants such as insect residues, tree sap, brake dust, tea stains and road salt – and makes their removal much easier.

INSECTS

TREE SAP

BRAKE DUST

TEA STAINS

ROAD SALT

CONTROLLED APPLICATION – MORE TIME, LESS STRESS

The generous working window of up to 5 minutes makes leveling easier and helps reduce the risk of visible coating residues and time-consuming rework.

1 PREPARE

Thoroughly clean the surface, correct paint defects and completely degrease.

2 APPLY

Wrap the applicator with a thin microfiber cloth, apply 8650 to the cloth and spread evenly over the paint.

3 BUFF OFF

Buff off within up to 5 minutes using a clean microfiber cloth.

STRONG PERFORMANCE. HIGHLY COST-EFFECTIVE.

Depending on vehicle size, approx. 25–75 ml per vehicle. After full curing, 8650 forms a transparent, highly durable protective layer with excellent surface adhesion – for long-lasting smoothness and easy maintenance.
