

Display Coating & Cleaning for Vehicles, Motorcycles and Boats

Large displays increasingly dominate the cockpits of modern vehicles. Instrument and infotainment screens are no longer small indicators but large-format touch displays. Currently, the average display size in new vehicles is around 9.6 inches, which corresponds to approximately 24 cm diagonal screen size. Depending on the vehicle class, displays between 7 and 12 inches are common; in higher-end vehicles, systems measuring 15 inches or more are increasingly being used, in some cases as continuous panoramic displays spanning large areas of the dashboard.

Most of these displays are touchscreens and are operated directly with fingers. As a result, they naturally become dirty very quickly, mainly due to fingerprints, skin oils and dust. Regular, gentle cleaning is therefore essential to ensure lasting clarity and optimal usability.

The CCM® display range offers a coordinated solution for this: a Liquid Glass display coating (an ultra-thin glass protective layer applied to the display surface) as well as various cleaning products – available as spray or wipes depending on personal preference. This enables fast, streak-free cleaning and ensures optimal visibility of the display.

APPLICATIONS

- In passenger cars
- In trucks and buses
- In commercial vehicles
- On motorcycles
- In agricultural and forestry vehicles
- In construction and municipal vehicles
- On navigation, camera and auxiliary monitors (e.g. reversing cameras)
- In motorhomes, caravans and boats
- On mobile phones and tablets

PROPERTIES OF CCM® CLEANER

- Plant-based ingredients, biodegradable
- Natural essential oils for a fresh, pleasant fragrance
- Surfactants of organic origin derived from coconut oils and sugar surfactants

PROPERTIES OF THE CCM® LIQUID GLASS DISPLAY COATING

- Displays become noticeably easier to clean
- Water-repellent
- Protection against micro-scratches
- Biostatic effect: bacteria cannot grow on the surface
- Very easy and quick application
- Invisible and imperceptible protection
- No impairment of touch or button functions
- Protection lasts at least one year
- TÜV tested and multi-award-winning
- Heat resistant

RANGE

Liquid Glass Coating

CCM905 Display coating kit with:
2 wet pre-cleaning wipes 10 x 14 cm,
2 coating wipes 10 x 14 cm
(each for approx. 1 m²),
2 one-way protective gloves,
1 microfibre cloth 10 x 10 cm
HS Code: 3208 9091

Cleaning

CCM106 250 ml cleaner +
microfibre cloth 20 x 20 cm in lid
HS Code: 3402 2090

CCM122 100 wet wipes 7 x 15 cm in small
round dispensing tub
HS Code: 3401 1900

CCM128 10 single packed double sachets
10 x 14 cm each wet & dry
HS Code: 3401 1900
