## ECOLOGICAL CLEANING PRODUCTS

[www.SOYECO.com](http://www.SOYECO.com)

**SOY ECO FRIENDS** is a series of ecological products intended primarily for safe and effective cleaning of devices and office spaces.

**The products don't contain:**

- ◆ dyes ◆ phosphonates ◆ parabens ◆ thickeners
- ◆ artificial ◆ fragrances ◆ SLS ◆ SLES

Our products are vegan, biodegradable, environmental-friendly and safe to use.

All products are manufactured in Poland and designed to protect the environment.

*Take care of our planet's future with us!*

*Soy Eco Friends Team*

**SOY ECO**  
FRIENDS

For the production of our liquids, we try to use bottles made of HDPE „Biobased” material, having the „I'm green” certificate. Our bottles are made of environmental-friendly material - sugar cane and during the production process carbon dioxide is absorbed from the air. Thereby it helps to reduce the emission of this gas to the atmosphere which contributes to the fight against the greenhouse effect. The composition of bottles in terms of biopolyethylene content has been confirmed by an independent Research Institute.

---

We use substances that meet the requirements of the EU Ecolabel certificate. Our products contain natural essential oils such as: orange or field mint oil for delicate and fresh fragrance.

---

We do not use fibers made of plastic for production of wet wipes. Our wipes are made of special paper thanks to which they are fully biodegradable.

## CERTIFICATES OF OUR PRODUCTS

All products labels in ECO series are made of FSC-certified paper awarded by an international organization dedicated to promotion sustainable forest development.

---

Our products have obtained the Viva Vegan certificate granted by a foundation acting for animals protection. This certificate is a confirmation that our products do not contain any animal products and compounds derived from palm oil and no animal was harmed in their production.

---

### WE USE VEGETABLE INGREDIENTS SUCH AS:

- ◆ Essential oils
- ◆ Vegetable oil surfactants
- ◆ Vegetable glycerin
