

Company: **Herma**
Product Name: **Book Cover**

Product Description: The new book cover from Herma offers several enhancements. Its edges are fixed using ultrasound, which avoids the use of glue, and there is no need to use adhesive tape that may damage the book. The book cover is made of recyclable polypropylene that contains no phthalates. It is available in 39 different sizes to fit all types of books and notebooks, including 24 x 32 cm.

Herma's new book cover is made of recyclable polypropylene

Company: **HSM**
Product Name: **Document Shredder Securio C16 & C18**

Product Description: The C16 and C18 units are compact entry-level devices best for use at home or a small office. Both devices are user-friendly and safe, as they are equipped with a security element that shuts the device down if pressed – for example, by children's hands. Similarly, both shredders have an automatic reverse function so that paper jams can be easily and safely removed. Moreover, the C16 has a practical handle recess on the top that simplifies and facilitates emptying the collection container. Both shredders are equipped with zero-power consumption or economical energy management, designed to integrate into the modern office environment. The shredders are "Made in Germany."

The Securio C16 from HSM is aimed at the SOHO market

Company: **Kangaro**
Product Name: **Heavy-duty Paper Punches**

Product Description: A complete new range of heavy duty paper punches, with punching capacity of 150 ~ 300 sheets at one time. The punches have a durable metal construction, encased with high impact ABS body and spring assisted high leverage action for optimum operational force. They are designed with a unique built-in mechanism to change punch pins, with no loose parts. There is an in-built spares storage compartment for storing extra spare parts to avoid looking for them. The punches are fitted with anti-skid feet to avoid damage to the desktop and slipping during use.

Kangaro's Heavy-duty Paper Punches contain no loose parts

Company: **CCM**
Product Name: **TUV-certified LED cleaners**

Product Description: CCM GmbH from Overath, the AgfaPhoto licensee for cleaning products, says it is the first company on the market to have its LED cleaners tested and certified by TUV Rheinland in Cologne. The certification ensures that they are safe for the user and do not damage sensitive LED screens.

The LED cleaners are available as sprays, wipes
